

Aurora Public Schools

Bond Projects Move Forward

During the summer break, APS will complete bond-funded construction projects at several APS schools.

Bond projects slated for completion in August include:

- Whole building remodels at **Altura, Elkhart** and **Lansing elementary schools**
- A new water piping system at **Lyn Knoll Elementary**
- Roof and swimming pool building repairs at **Hinkley High School**

Over the summer, work will also continue on the installation of athletic fields at the new Aurora Hills Middle School, which opened in January. The fields will be completed by October 2012.

Construction progresses on additions to Elkhart Elementary School.

In addition to construction projects, the bond is funding more than \$13.6 million in technology improvements, including new computers, computer network and telephone system upgrades and cutting-edge classroom technology.

Aurora voters approved the \$215 million bond measure in 2008. To learn more about bond projects, visit aurorak12.org/bond.

Did You Know?

You can view upcoming district and school events on the online APS Events Calendar. The calendar includes a wide range of events from Board of Education meetings to school performances. To view the calendar, visit aurorak12.org/about-aps/events-calendar.

APS staff members can also use the website to submit events at their school or site for the calendar.
